DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble sets forth "an apparatus for suspending vibratory element from a support", however, applicant in the claim recites positively the connections of the claimed apparatus and the vibratory element and support which makes it unclear as to whether or not the claim encompasses the apparatus as well as the vibratory element and the support. If not examiner suggest use of intended words "adapted", "for" , "capable of", etc....such as "adapted to coupled to the vibratory element".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sharp et al (US patent no. 5,117,659). Sharp et al discloses apparatus for suspending comprising first element being a rod (46, figure 3) having first end (44) and a second

end (46b) and a tension spring (54) connected to first element (46) to second element (68),

Claims 3-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art of record demonstrate vibratory element supports of interests.
